## Coir Peat Block (5kg)

We supply Coir Peat 5kg Blocks in two variants – washed and unwashed. Washing controls the EC of the product that is important for root and plant growth. The Coir Peat Blocks are easily breakable. These can hold more than 75-liter water per block and 16,500 liters per pallet. PH of the media is neutral that aids good absorption of nutrients. These have less fungal infections than soil, as well.

### Types of Blocks

- Low EC Fine Grade
- Low EC Standard Grade
- Low EC Course Grade
- Low EC Super Fine Grade

### Application:

- Vegetables
- Plants
- Leafy Vegetables
- Flowers

## Coco Peat Bricks

Coir pith is a tribute to the Mother Nature from everyone here at Asian Eco Coir as it is completely eco-friendly and augments the values of nature. It is totally organic and fully safe to use as it is sterile to weeds. It has a water retention capacity of almost 77% which makes it very useful for retaining the useful nutrients and water from leaching out. Moreover, the coir peat bricks make the soil friable and aerated thereby helping the roots to get more oxygen. We can also manufacture the coir peat bricks in the size of 500 gm and 250 gm in accordance with the wishes of our customers.

The coir piths are very easy to use. All you need to do is:

- Place a coir peat brick in a large container
- Pour clean water over it and leave it in that condition to absorb water to expand
- After the water is completely absorbed, mix it carefully to speed up the process of breaking up
- To get an ideal potting mixture, add one part of the compost and coarse sand with one part of the coir peat brick.
