

POT MIX

(Home Garden Soil Mix)

In today's world, growing our own vegetables, fruits, and greens at home is no longer a choice—it's a necessity for safe, chemical-free food. The first step is healthy soil, and that's exactly what Artic Organics Pot Mix provides.

Why Artic Pot Mix?

- Scientifically prepared with NPK, CMS, and micronutrients for strong roots, sturdy stems, and improved disease resistance
- Lighter than normal soil → ideal for terrace gardens
- Balanced with the right pH, EC, and TOC, lab-tested for quality assurance
- A complete ready-to-use mix → no need to add extra soil

What's Inside?

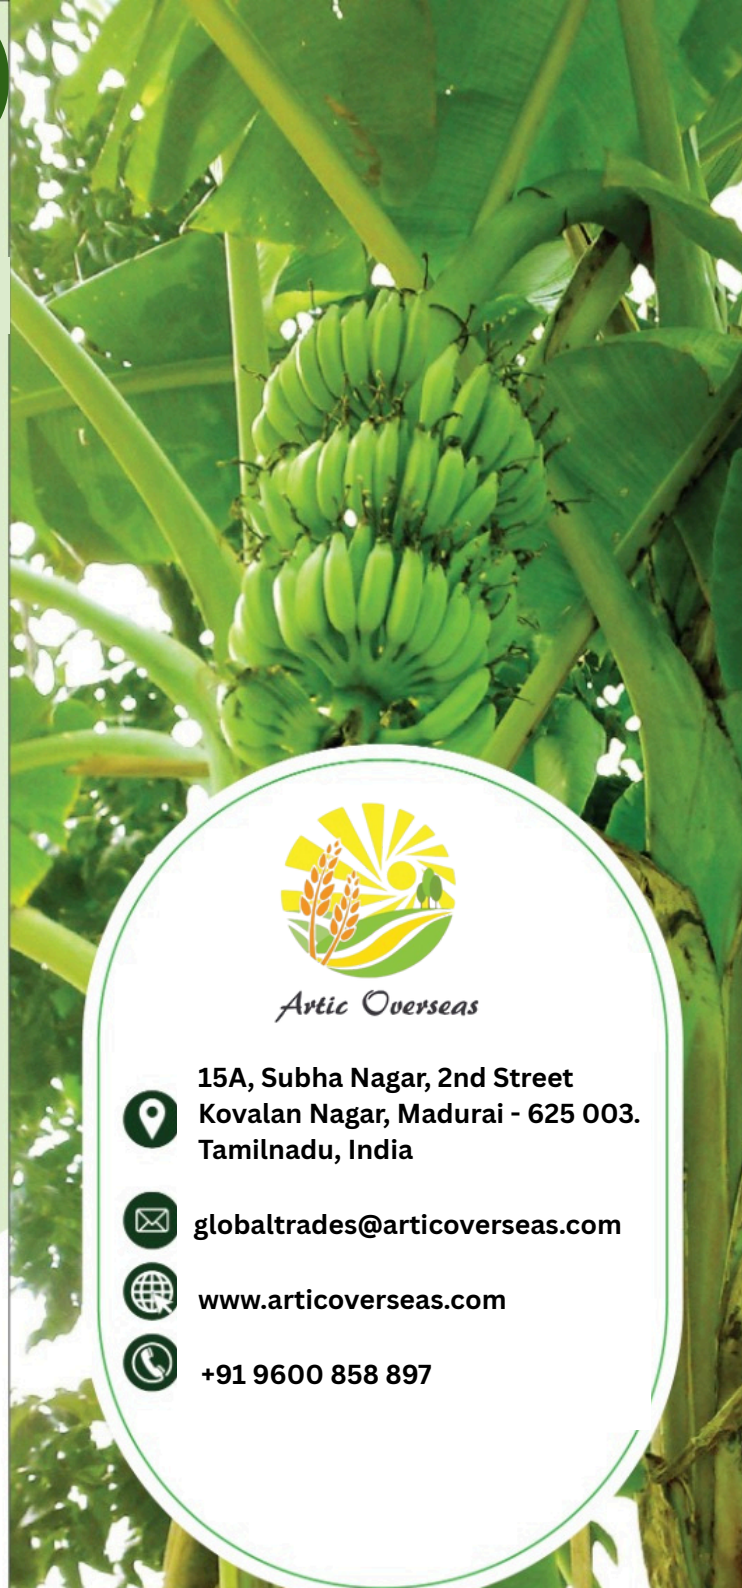

- Neem Cake Powder → natural pest protection
 - Vermi Compost → lush green foliage
 - Coco Peat → excellent water retention
 - Bio Fertilizers → rich in beneficial microbes
- Together, these natural ingredients ensure healthy plant growth, better yield, and reduced maintenance. The mix absorbs water like a sponge, so you save water while keeping plants nourished.

Available Packs: 5 Kg | 10 Kg

Best Before: 6 Months

Storage: Store in a cool place

ARTIC ORGANICS

ENRICHING FARMING

RENEWABLE RESOURCES MFG UNITS

Enriched Organic Compost

(100% organic)

Enriched Organic Compost is a premium natural fertilizer made from carefully composted farm waste, vegetable residues, and leaf litter using advanced aerobic composting technology. This scientific process multiplies beneficial microbes, resulting in a nutrient-rich organic manure that keeps your soil healthy and your crops thriving.

Why Artic Organic Compost?

- Rich in NPK (Nitrogen, Phosphorus, Potassium) for balanced plant growth
- Contains secondary & micronutrients blended with Total Organic Carbon (TOC)
- Nutrients are made available in a form that plants can easily absorb

Benefits for Farmers

- Improves soil texture & boosts root development
- Enhance water-holding capacity for healthier crops
- Promotes greener leaves → better photosynthesis → higher yield
- Reduces dependency on costly chemical fertilizers
- Balances soil pH & preserves soil fertility
- Naturally helps in weed control

Recommended Usage

- Rainfed crops: 200 kg per acre
- Irrigated crops: 350 kg per acre Perfect as a basal fertilizer during final ploughing for crops like maize, millet, pulses, cotton,

Available Packs: 1 Kg | 5 Kg | 26 Kg Storage: Keep sealed in a cool place. Use within 3 months for best results.

Artic Organics

The natural choice for healthy soil and higher yield.

ARTIC ORGANICS

Activated Vermi Compost

Bring your home garden to life with Artic's enriched Vermi Compost - a premium organic fertilizer designed to promote healthy microbial growth in soil, resulting in toxin-free vegetables, luscious fruits, and vibrant flowers right from your own backyard.

Why Choose Artic Vermi Compost?

- Loosens compact soil, improving water retention and aeration
- Promotes strong root growth for healthier plants
- Acts as a slow-release fertilizer, ensuring steady supply of nutrients & minerals
- Balances soil pH, preserves fertility, and enhances crop yield

How to Use

- Vegetables (Tomato, Chilli, Brinjal, Ladies' Finger, etc.) Add about 100 g per plant, mix into the soil, and water for healthy growth and higher yield.
- Flowering Plants (Rose, Jasmine, etc.) Once a month, mix a handful around the base → ensures healthier plants and bigger, colorful blooms.
- Fruit Trees (Coconut, Banana, Sapota, Custard Apple, Guava, etc.) Apply 2-5 kg every 3 months with watering → results in higher yield and better-quality fruits.
- Field Crops (Tomato, Cucumber, Ladies' Finger, Chilli, Sunflower, Maize, etc.) During the final ploughing, apply at least 250 kg per acre → ensures rich soil and better harvests.

Available Packs: 1 Kg | 5 Kg | 26 Kg Storage: Keep sealed in a cool place. Use within 3 months for best results.

Artic Organics

- For Healthy Soil, Healthy Plants, and Healthy Living.

Fish Amino Acid

(FAA)

Fish Amino Acid is a natural fertilizer made through scientific fermentation of fish waste. It is a powerful bio-stimulant that promotes natural plant growth, enhances soil health, and protects crops from pests and diseases.

Why Artic Fish Amino Acid?

- Provides nitrogen naturally by fixing atmospheric nitrogen - reducing urea dependency
- Rich in proteins → stimulates natural crop growth
- Improves plant immunity → protects against diseases
- Acts as a natural pest repellent → controls mealy bugs, whiteflies & aphids
- Keeps fields and gardens free from rat damage

How to Use

- Flowering Plants Mix 2-3 ml per liter of water and spray once every 2 weeks. Encourages lush green leaves, healthy plants, and bigger, colorful blooms.
- Home Gardens / Terrace Gardens (Vegetables, Fruits, Flowers) Mix 3-5 ml per liter of water and spray once every 2 weeks. Ensures vigorous growth, larger vegetables, and nutrient-rich fruits.
- Crop Fields (Vegetables, Flowers, Paddy, etc.) After 30 days of planting, mix ½-1 liter FAA in 100 liters of water per acre and spray. Improves growth, prevents flower drop, and ensures better fruit and pod setting for higher yield.
- Fruit Trees (Coconut, Banana, etc.) - Root Application
 - Mix 5-10 ml per liter of water and apply at the root zone.
 - For Coconut Trees "Mix 10 ml FAA with 90 ml water, fill in a packet, cut a root and tie it. The tree absorbs directly → better fruit set, no immature drop, bigger nuts."
- Usage Tip: Always spray in the evening for best results.

Storage & Shelf Life

- Best before 6 months
- Store in a cool, dry place in an airtight container

Artic Organics

- Grow Naturally. Eat Healthy. Live Better.
