

USP

- One stop total fire solution company . Fully integrated solution providers for highest level of protection and safety of both life and property .
- Reliability, Quality assurance and reliability are of the greatest importance this has been achieved by careful selection of our suppliers; highly reputable producers such as Naffco UAE which is the 5th largest manufacturer of fire fighting equipments , Fittings for Pipes from Victaulic and Detection systems from Esser Honeywell etc
- Maintain international standards in terms of products and strictly comply with the Fire Norms – IS Standards , Building and Fire codes and NFPA Standards .
- Bajaj is one of the few company's that deploy Fire sprinkler, Fire alarm & detection systems of the highest standards approved & recognized in the industry.

No safety knows Fire,
know safety no Fire.

Mechanised Solutions Are Provided For Reducing The Customer Pains

- Trench diggers are available for digging trenches on sites
- Grooved fittings to assemble the pipes instantly
- Ready made pipe laying beds made of soil bags
- Skid mounted pump assemblies with panel , pressure switches , gauges , priming tank etc which reduces the cost of installation and foundations needed are very small than the conventional systems
- PU paints and anti corrosive coatings are used on pipes and fittings to enhance the life of the hydrant systems
- Ready made GRP Tank solutions available to reduce the pains of making civil tanks which are very time taking

ABOUT US

Bajaj Steel Industries Limited (Bajaj), a company of Bajaj Group of Nagpur, India was established in 1961. It is a public limited company listed on Bombay Stock Exchange. With over five decades of experience and expertise Bajaj has a world-class engineering facility with a diverse industry presence i.e. Cotton Ginning, Bale Pressing, Chemical and Mechanical Delinting, Seed Decorticating Machinery, Steel Buildings, Electrical Panels, Spare Parts etc.

Fire Hydrants

The fire hydrant system is the backbone of the fire fighting systems in a building or premises . The purpose of the fire hydrant system is to provide a readily available source of water to any point throughout the building or premises . This helps in controlling fire during an emergency.

Fire Sprinkler System

A Fire Sprinkler is an active fire protection measure , consisting of a water supply system , providing adequate pressure and flow rate to a water distribution piping system onto which fire sprinklers are connected . The typical sprinkler head is activated by heat (temperature) and triggers as soon as the particular temperature is obtained .

Fire Detection And Alarm Systems

Fire detectors are designed to detect 1 or more of the 3 characteristics of fire – smoke , heat and flame . The detection system also includes call points , alarm sounders , addressable panels etc to arrest the attention .

FIRE Fighting

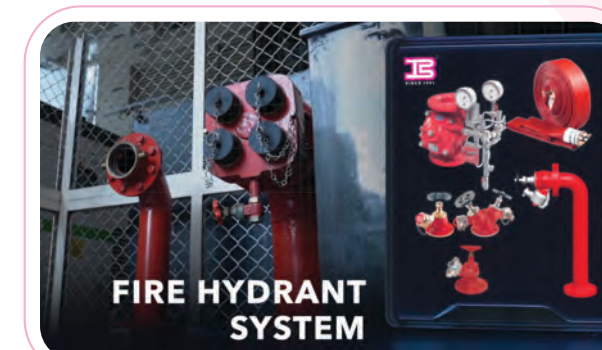

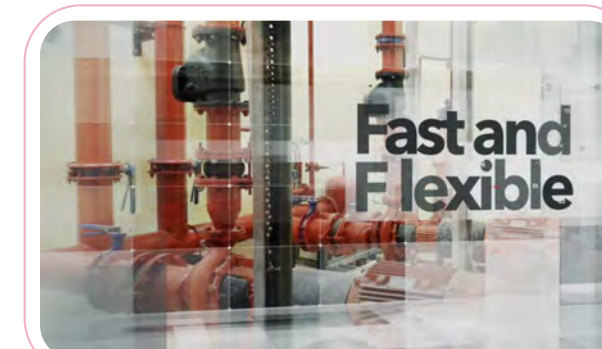

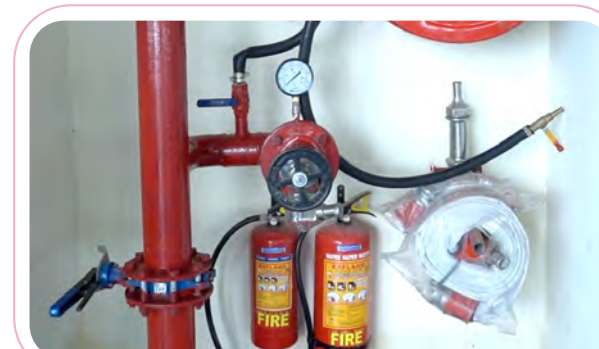

Solutions

Products Gallery

Fire fighting products are essential tools that play a crucial role in helping firefighters extinguish fires and save lives. These products include fire extinguishers, hose reels, pumps, nozzles, and various types of protective gear. Highly specialized equipment such as breathing apparatuses and heat-resistant suits are particularly effective in high-intensity fire emergencies. Firefighting products have evolved considerably over the years, becoming more sophisticated and effective in order to keep pace with modern safety demands. The best fire fighting products combine cutting-edge technology with ergonomic design, rigorous safety standards, and ease-of-use features for optimal performance. Moreover, reliable maintenance is crucial for prolonging product lifespan and ensuring maximum safety levels. Firefighting professionals demand the highest-quality products that ensure their safety as they work towards protecting others during challenging situations.
