

POTAMINO

Organic Potassium Liquid Fertilizer (46.5%)

POTAMINO : is a highly effective liquid potassium concentrate complexed with natural amino acids, designed to deliver a fast-acting, bio available form of organic potash. As the second most important nutrient after nitrogen, potassium (K) is essential throughout the crop cycle.

When combined with natural amino acids, POTAMINO provides a superior fertilizer option that regulates water usage, enhances disease resistance, and improves nutrient utilization. Its low salt index and absence of sodium and chloride ensure it causes no physical harm to plants.

Key Benefits

- **Bioavailable Potassium:** Delivers potassium in an organic, fast-acting form.
- **Improved Crop Health :** Regulates water usage and strengthens disease resistance.
- **Enhances Nutrient Efficiency :** Promotes better absorption and utilization of nutrients
- **Safe and Non-Toxic :** Free from sodium and chloride, ensuring no physical harm to plants.

Application Method

- **Application Type :** Suitable for both foliar spray and drip irrigation.
- **Compatibility :** : Can be mixed with most fertilizers and agrochemicals except those with acidic reactions or concentrated calcium solutions.

Recommended Crops:

All crops including short term, mid-term and long term, paddy, vegetables, Apple, potato, Wheat, cotton, Watermelon, Cardamom, grapes and Onion and Use wherever potassium deficiencies are observed during the crop cycle.
